

**FOR IMMEDIATE RELEASE:**

**WSource Group LLC retains lobbyist Lori Killinger of Lewis, Longman & Walker to concentrate on upcoming Florida water issues**

Pensacola, Florida and Tallahassee, Florida – November 16, 2009

WSource Group LLC, a water rights and resources development and information company with offices in Pensacola, Florida, and Big Timber, Montana, has retained Florida water lobbyist Lori Killinger of Lewis, Longman & Walker, P.A., to concentrate on Florida Legislative, Executive and Water Management District initiatives involving water resources. Ms. Killinger will also advise WSource regarding a strategic plan to implement its water rights and resources Monitoring·Management·Information™ services in Florida.

WSource partners with and assists landowners in strategic planning, developing, conserving, monitoring, and managing water resources and rights. Proper water resources planning that incorporates the identification of new, beneficial water project opportunities, along with lobbying and improving information delivery concerning water-related government activities, funding sources and news is critical for private landowners, utilities and local governments alike. “Having an experienced team member like Lori that is readily accessible to our clients and venture partners, while being focused on the State’s water issues, is a key component to our early identification and facilitation of important water projects across the State,” said John L. Fiveash, Managing Director of WSource.
